

Hello families of Middle School students!

All students entering Middle School need to spend **AT LEAST 1 hour per week** of the summer on [khanacademy.org](https://www.khanacademy.org) reviewing and improving on their math skills from the previous school year.

Incoming 6th graders need to:

1. join class code NXG59BZ5
2. work on 5th grade math.

Incoming 7th graders need to:

1. join class code 3BBEBXCX
2. work on 6th grade math.

Incoming 8th graders need to:

1. join class code 883Q3KXD
2. work on 7th grade math.

I can only give credit for time spent studying while signed into the proper class, so the class code is essential and signing into your Khan account before working is required. At summer's end, those students who are able to work for at least 1 hour per week on their math topics will receive a 100% for their first test grade of the year.

Thank you and please enjoy the 167 hours per week of the summer that you are not required to do mathematics for me on Khan Academy.

Mr. Salm
